

Since its launch in late 2007 the Airforce has become the top selling low energy dryer on the market.

The combination of Airforce's highly competitive price, ultra fast dry time of just 12-15 seconds, compact sleek design and the flexibility to dry both hands and arms due to our 'hands under' design philosophy; allied to its maintenance-free operation, lightweight construction (allowing it to be mounted onto any wall substrate) and a 5 year on-site warranty has proven to be irresistible to both contractors and end-users alike. All this *plus* the lowest energy consumption in its class makes the Airforce range the obvious choice for discerning customers wishing to both save money and reduce their carbon footprint.

2009 brings the introduction of two new finishes, brushed chrome & black, & greatly reduced noise levels. The best is now even better!

Buying guide
